

J2 FLOORING®

www.j2flooring.com

Our Passion is Your Floor...

At j2 Flooring, floors are not just what we sell, they are what we live and breathe. Our passion for flooring is evident in everything we do and drives us to producing the very best flooring products on the planet.

Since our first product launch in 2011, to this very day, we are still excited about every single product we produce. Seeing people choose our floors for their homes fills us with great joy and immense pride.

The products you see in this brochure have all been designed with two fundamental principles; Durability and Style.

Durability is our key principle, to ensure we produce products that are built to last. Our floors are manufactured to the highest standards and as such are guaranteed from 12 years to lifetime. The practical performance of our LVT is the reason people choose us time and time again.

Secondly Style; nobody wants an ugly floor! Which is why we work tirelessly to bring you the most authentic and beautiful floors to your home and business. From textures, knot formations and colour, to bevelled edges, sizes and border - they are all meticulously debated, discussed and carefully chosen to ensure you acquire the most unbelievable flooring.

We hope you love our floors as much as we love creating them for you.

Stephen Latham

Features & Benefits All of our Floors Possess...

Before you select colour, style and design, there will be a specific practical requirement you expect from your floor. You maybe questioning whether our floors are suitable?

This could be something general, such as being easy to clean, hard wearing or warm underfoot, through to more personal requirements, such as being suitable for pets or environmentally friendly. These are unique to you and your home.

In this section we aim to give you the information you need to know, which applies to every floor in the j2 Flooring range. You can then focus on selecting the right colour and style, safe in the knowledge that the one you pick ticks all the boxes on these pages.

Waterproof

From dog bowl spillages to splashy bath times, our floors are 100% waterproof. Peace of mind, and also makes cleaning a lot easier!

Compatible with all types of Underfloor Heating Systems

Upto 27oc and installed in accordance with our installation instructions, our floors work perfectly with UFH.

Party Proof

Our floors love a good party, as they are durable, easy to clean and can withstand high heels, giving you one less headache when you are hosting a lively one!

Versatile

Whether its the hallway, bathroom or open plan living space, all our floors are suitable for every room in the home, even stairs. However, as our SPC Rigid Click is a floating floor system, it is not suitable for every environment. It is important to consult with your flooring professional to understand whether your space is suitable.

Kid Proof

All our floors are perfect for homes with little or big kids, as they are hygienic, and very durable.

Slip Resistant

All our floors achieve a 36+ score on the PTV test; This translates into a low slip potential. Even when wet, some of our products achieve this score. For more information, see our data sheet information at the back of the brochure.

Authentic

The Authentic, realistic appearance of our floors is one of our founding principles. From the colours, knots & character, to the texture and features. You will find all j2 Floors are designed to look and feel as realistic as natural materials, with the practicality only Luxury vinyl floors can offer.

Check out the detail in our Natural Timbers Collections

Guaranteed
All our floors come with wear warranties, see page 137 to learn more

Quieter Underfoot

LVT and SPC are a quieter material compared with other hard floor options such as laminate, wood and stone. Making it brilliant for all areas of the home.

Easy to Clean & Maintain

Our floors require very little maintenance and are very simple to clean with a brush, vacuum cleaner and mop. See page 139 for more details

Environmentally Friendly

All our floors achieve Greenguards Gold certification. This means they are not manufactured with any formaldehyde, heavy metal or benzene, and are also recyclable. All floors as receive FloorScore certification for indoor air quality.

Hardwearing & Durable

All of our floors are built to last. They are manufactured to the highest quality levels and the wear layers are extremely tough, suitable for the busiest of homes and also commercial applications.

Pet Friendly

We love pets, and pets love our floors! All our floors are perfect for homes with pets, as they are easy to clean & softer under paws and claws compared with stone or laminated floors.

They are also a lot more hygienic than other natural flooring materials, as bacteria is unable to grow on the surface of LVT.

Naturally Warmer Underfoot

LVT (Luxury Vinyl Tiles) and SPC (Stone Polymer Composite) conduct heat a lot better than alternative products, and are therefore naturally warmer underfoot.

For more information regarding our floors see towards the back of the brochure or get in touch...

Where to Start...

Our Luxury Vinyl Flooring falls under two distinct installation types: Gluedown (also classed as LVT), which is the traditional method, and Rigid Click SPC (Stone, Polymer, Composite), which is a click together, floating floor system. Before you choose your colour and style, consult with your flooring professional and read our tips below, to find out which one is best suited to your space, budget & demands.

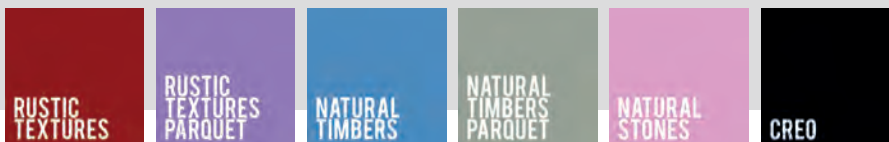

Gluedown

Consider this option if;

- You need a more stable and permanent floor fixing.
- You want to use different laying styles, borders and design strips.
- You want to use a combination of styles, and also want the floor to run continuously without the need for breaks or expansion gaps.

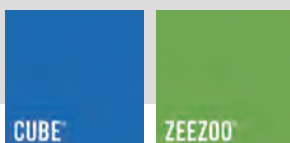

Adhesive is spread onto the newly prepared subfloor and the Luxury Vinyl Flooring (LVT) is laid into the adhesive to create a permanent bond

Rigid Click SPC

Consider this option if;

- You already have a solid, smooth and level floor.
- You are looking for a quick and easy floor to lay, which is DIY friendly.
- You are not looking for a permanent fix or glued down product. This can be easily taken back up if required.

Throughout the brochure, to help you understand which product is Gluedown or Click, the adjacent icons are displayed on each image.

To make it easier, we have kept all the gluedown products together and all the click products together. See the contents overleaf to navigate each product type, and find your inspiration.

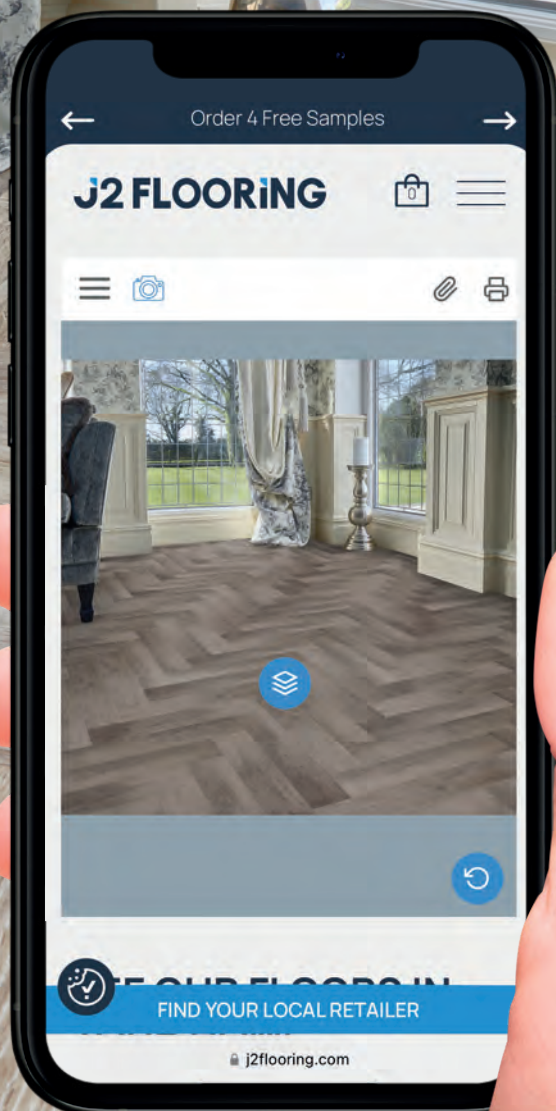

Room Visualiser

See what your future floor could look like in your very own space. Simply take a picture of your room and upload it to the room visualiser software on our website.

Play around with all of our different floors and change laying styles and patterns to find your perfect match.

Visit www.j2flooring.com/roomvisualiser

Introducing our Ranges

Within our flooring collections, you will see a square coloured logo next to each product. These are sub ranges, which have different features, formats and specifications. To help you understand more about the different collections, we have put together a small table so you can see the main features of each collection.

Edge

This refers to the finish to the edge of the product; each collection will have one of the following:

Square, so no groove (bevel),

Micro Bevel, which creates slightly more definition,

Bevel, which is a more defined and deeper groove (bevelled edge).

Square Edge

Micro Bevel Edge

Bevelled Edge

Collection Logo	Collection Name	Installation Method	Wood	Stone	Design	Thickness	Wear Layer	Wear Guarantee	
	Rustic Textures	Gluedown				2.00mm	0.30mm	12 Year Residential	
	Rustic Textures Parquet	Gluedown				2.00mm	0.30mm	12 Year Residential	
	Natural Timbers	Gluedown				2.50mm	0.55mm	Lifetime Residential	
	Natural Timbers Parquet	Gluedown				2.50mm	0.55mm	Lifetime Residential	
	Natural Stones	Gluedown				2.50mm	0.55mm	Lifetime Residential	
	CREO	Gluedown				2.50mm	0.55mm	Lifetime Residential	
	CUBE	Click				6.00mm	0.50mm	Lifetime Residential	
	ZEEZOO	Click				5.50mm	0.30mm	Lifetime Residential	

Texture

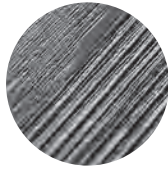

To give the effect of natural materials, all of our products are designed to replicate the surface texture they are inspired by. Throughout the brochure, we will use the symbols below, to distinguish the texture type of each product.

The Typical Surface structure of a Registered Emboss Product

Registered Emboss

The Typical Surface structure of a Wood Emboss Product

Wood Emboss

The Typical Surface structure of a Stone Emboss Product

Stone Emboss

Registered Emboss. This is the most realistic & authentic wood grain texture available, where the texture matches the print film to give a 3D style and accentuate knots and markings.

Wood Emboss. Is a linear texture which also looks and feels like wood grain, but doesn't follow the structure of the print film.

Stone Emboss. Is the stone, slate or marble finish, which replicates a natural stone in appearance and touch.

	Size	Edge	Texture	Range Overview
	Plank 914mm x 152mm Tile 914mm x 304mm	Square	Wood Emboss	A collection of wood planks and stone designs, with natural textures and designs to suit all styles.
	Herringbone 610mm x 122mm	Micro Bevel	Wood Emboss	A small collection of designs taken from the Rustic Textures collection, these smaller planks are the herringbone versions with natural texture and a micro bevelled edge.
	Plank 1219mm x 184mm	Bevel	Registered Emboss	Our largest range of wood plank styles, featuring natural print film designs, our exclusive registered emboss surface structure and bevelled edges, makes this our most authentic wood plank collection.
	Herringbone 610mm x 122mm	Bevel	Registered Emboss	A collection of herringbone LVT's, which complement some of the same colours in the Natural Timbers Collection. Also featuring registered emboss surface texture and bevelled edges.
	Tile 610mm x 305mm	Bevel	Stone Emboss	Our largest collection of stone designs. Natural Stones offers an ultra realistic alternative to natural stone, still featuring the same texture, look and feel of stone, but with the practical benefits of LVT
	Various Sizes	Bevel	Various Embossing	CREO is our designer LVT. From basket weave, to panels to Victorian tile designs, CREO is a creative collection with unlimited design options.
	Plank 1220mm x 183mm	Bevel	Wood Emboss	A collection of 6 wood designs in a durable SPC, all cube products feature a built in underlay and uniclic locking system for ease and quality installation.
	Plank 914mm x 152mm Tile 914mm x 304mm Herringbone 650mm x 150mm	Micro Bevel	Wood Emboss Stone Emboss	A collection of wood plank, tile and herringbone designs in a durable SPC. All ZEEZOO products feature a built in underlay and uniclic locking system for ease and quality installation

Wood

Our wood designs come in many different colours, designs and formats, to suit your individual style.

Taking flooring inspiration from across the globe, we feel our collection of wood designs gives you so many more options to allow you to express your personality and create a floor that is bespoke to you. Explore the many different formats within, either flick to the ones that you like, or simply turn the page and be inspired!

Plank

Traditional plank flooring, available in a variety of colours and sizes.

Page 12

Bloc

A retro pattern, which gives a new dimension to any space.

Page 71

Herringbone

A popular format and laying style, available in a few different sizes.

Page 42

Panels

A collection of stylish panels featuring geometric designs inspired by Parisian architecture.

Page 73

Chevron

Sophisticated weave pattern, which offers a more linear look.

Page 65

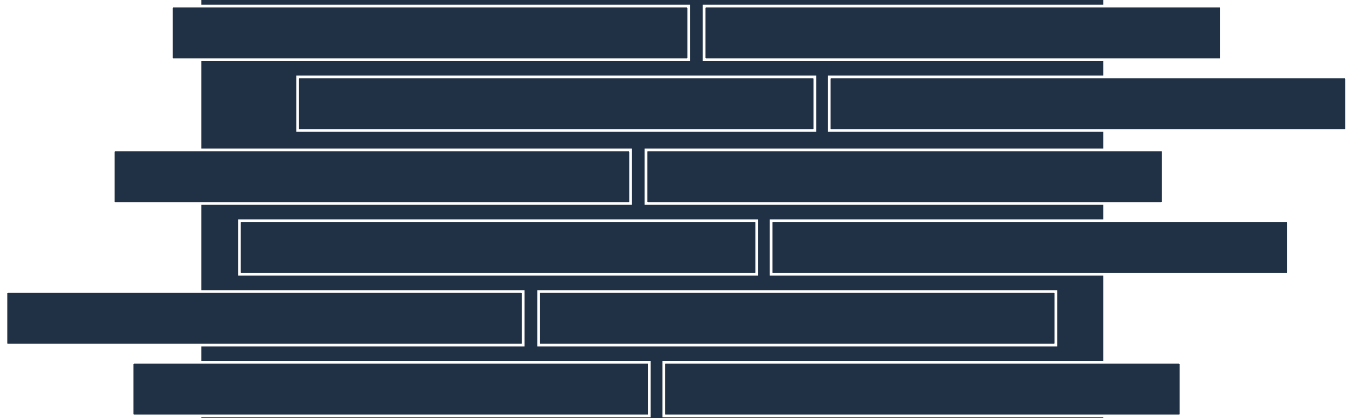

Basket Weave

A classic weave style floor, which creates a beautiful feature.

Page 68

Plank Styles

The most traditional laying style, our plank styles come in a variety of colours, sizes and designs. Featuring all the benefits of real wood with the practicality and durability of LVT.

From pale and fresh grey, to warm and sophisticated oak, there is a plank style for all spaces

Weave Styles

Discover the options of flooring designs with our weave collection.

From the retro style of Bloc and the understated classical Basket weave design, through to the Parisian flair of Chevron, there is a design in our Weave collection to match the most eclectic of interiors.

Browse the pages and be inspired by our Weave patterned LVT floors

Chevron

The increasingly popular Chevron weave design is a stunning linear pattern, which looks great flowing throughout rooms.

Available in a variety of wood looks to complement your interior space.

Glacier Oak BSK48

Basket Weave is a traditional parquet flooring design originating centuries ago. The intricacy of the design makes it a firm hit with those after a different laying style compared with other weave styles such as herringbone.

At j2 Flooring, our Basket Weave is not simply a printed tile, but each square and rectangle piece is individually cut, bevelled and features our exclusive embossed surface structure, for the ultimate definition and authenticity.

Bloc

Our take on a retro floor style. Bloc is inspired by the stylish interiors of the 1960's, where psychedelic patterns featured heavily in homes around the UK. With our take on this classic style, we feel Bloc belongs in both traditional and modern homes, where different patterns and styles can be combined creatively.

Regal Timber BLO55

Roasted Oak BLO50

How it Works...

Although it looks complex, Bloc is a very simple pattern made up of two triangles, which are placed back to back to create a 228.6mm x 228.6mm square (as shown above. Each triangle is then surface bevelled to create the definition and design. Clever stuff!

Blonde Oak BLO49

Also Featuring Deco Luna in Beige & Cream

Panel Styles

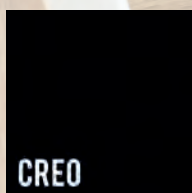

Inspired by the amazing artistry of the French craftsman, during the Baroque era, our panel LVT floors are hand crafted to bring you a visually stunning design floor. With a variety of geometric designs built inside a frame, explore the full Panel collection over the page.

 **MADE IN
BRITAIN**

Dare to be different

The Panel Collection offers an escape from standard timber flooring options into a world full of character, history and opulence.

Redefine your space with a floor that stands out above the rest

Collection

Ultra Authentic
Registered Embossed
Surface Texture

Bevelled Edges

Did you Know...

Each Panel is 550mm x 550mm and all components which make up the design are individually cut and bevelled to create their authentic and natural finish.

Every wood design in our CREO Panel Collection has a Registered Embossed surface structure. Registered Emboss texture is where the hardened wear layer is crafted, to replicate perfectly, the print film underneath. You get the appearance of a natural brushed timber floor, with knots and markings, but in a super durable and easy to maintain practical floor such as LVT. See below some of the close ups of the detailed texture shown in each panel.

Versaille

Bretagne

Mansion

Versaille

One of the original panel designs, which takes its name from the very place it originated. Our Versaille panel is inspired by the Grand Palace of Versailles' stunning parquet flooring. This design features the popular basket weave pattern set inside a frame.

CREO

Carpenters Oak VER43

Carpenters Oak VER43

Did you Know...

All components inside our Panels are individually cut and bevelled, for the most authentic and defined LVT. This technique coupled with our unique Registered Emboss surface texture, makes it one of the most beautiful design floors available.

Stone Styles

Our tile styles are inspired by natural stone and improved by design.

Get the look of Limestone, Terrazzo, Marble and Slate with authentic formations, colours and textures, but in a warm, durable and easy to maintain LVT .

Our Inspiration...

Visiting the sources! Here are some of the inspirations we used to create our stone collection.

Slate Quarries of the Lake District inspired our Cumbrian Slate NS68. The contrasting markings in this design are matched by the unpredictable markings in natural slate

Blushed Marble NS60 was inspired by the Carrara region of Italy, which is home to some of the worlds best and most beautiful marble.

The matt, tumbled finish we have applied to this tile, helps create the luxurious look and feel, which has been improved by being warmer, quieter and softer underfoot, compared with natural Marble.

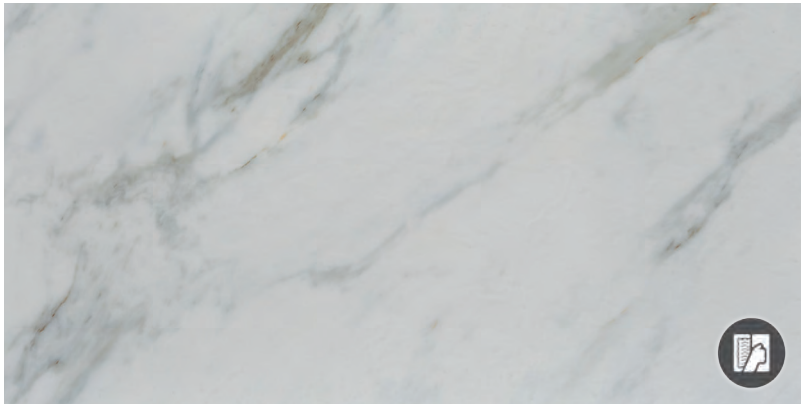

Travertine is a beautiful stone and makes an amazing floor tile. Abruzzo Travertine NS61 was created to replicate the beautiful simplicity of this stone, but in a hard wearing and extremely practical LVT.

Opting to use a clean, less pitted travertine finish, our Abruzzo Travertine is natural and maintains this simplicity in its formation.

How are the Grout Lines Achieved?

During installation, design strips are placed into the floor alongside the tiles, which create the 'grout effect'. You can choose different colours of design strip to give the desired look, or opt to exclude them altogether, which will create less tile definition.

Authenticity of Natural Stone Practicality of Luxury Vinyl Flooring

See how our head designer set about creating the Natural Stones collection...

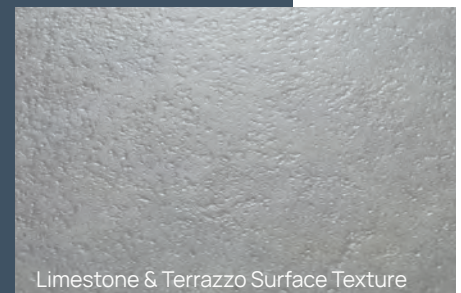

The key objective for the Natural Stones collection was to maintain the authenticity and beauty of a natural stone floor, but made in our durable LVT for greater practicality and warmth underfoot.

This started with us visiting several European mills and quarries, to find inspiration from the source and collect samples of various types of stone, from Marble, Terrazzo, Limestone & Slate. From here we worked closely with the print film manufacturer to design the decor layers, which best replicated the most authentic markings and formations, present from the natural examples.

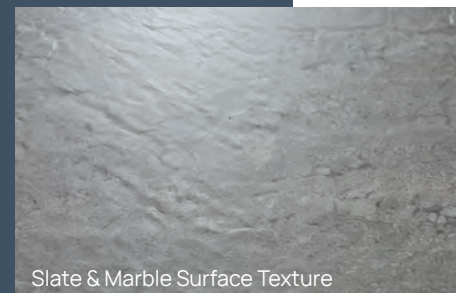

Next it was all about replicating the authentic texture and appearance. Choosing the wear layer structure (the top layer) to best replicate its natural counterpart, meant selecting the finish which closely matched the style of stone. You will see our slate and marble designs have a more riven texture (which is more akin to this particular stone) and our Limestone and Terrazzo tiles have a much more smoother pitted structure (again similar to the finish on these natural stones).

Adding a good bevelled edge, also created the right definition and added a greater depth to the tile, which is important to the appearance.

We hope you love the collection as much as we loved creating it!

Using Design Strips

Design strips are used in LVT to either run around the perimeter of a room as a border to highlight features and create a personalised look to your floor, or in between tiles and planks to create a grout or ships decking effect. Design strips are made of thin strips of LVT and are installed at the same time as the main floor. Speak to your j2 Flooring supplier about using design strips on your floor.

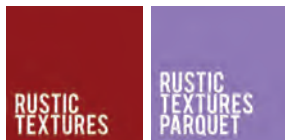

Design strips can be curved around features such as this bull nose stair

Design strips can be laid in between tiles or planks to create a grout effect or ships decking

Design strips can be used around features such as a fire place or kitchen units to add a personal touch to your space

Luna

CREO

Luna is a modern geometric pattern, which uses two colours to create a stunning feature floor. Whether its used as an LVT rug under a table or around a hearth, or its just used to create an ultimate statement in your space. Luna will not disappoint.

Navy Blue & Greystone

Pale Green & Cream

The surrounding floor is CREO Panel Versailles in VER51 Pale Oak

How the Pattern Works...

Luna is made up of 4 triangular pieces, each crafted with individual bevelled edges and surface bevel detail, which make up a square tile design when laid together (seen below in black and white).

Each tile is 228.6mm x 228.6mm in size and when laid on a 45 degree angle, produce the pattern as displayed. Due to the geometric nature of this design, there are also a variety of ways you can lay the tile to create a different look.

Navy Blue & Greystone

Terracotta & Fawn

Cream & Greystone

Grey & Greystone

Remember
If you would like a colour combination, not shown in our standard colour options, we have a bespoke service, which offers any colour combination. See the back pages for details or ask your supplier for more details

Beige & Cream

The surrounding floor is CREO Weave Bloc in BLO49 Blonde Oak

Victorian Tile Styles

The decadent and sophisticated Victorian style is epitomised in the stylish and traditional Floor Tile designs of this period. At j2 Flooring, we have been inspired by these stunning intricate floor patterns and designed a collection dedicated to this era, created in our durable and easy to maintain LVT flooring.

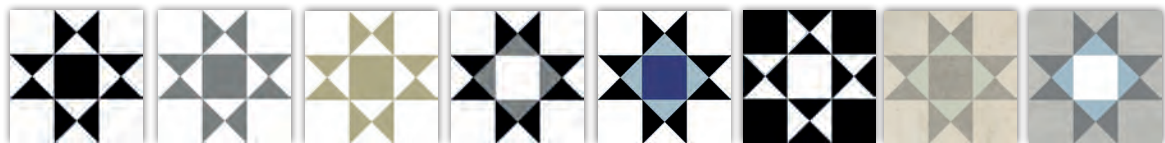

How Our Victorian Tiles Work...

Our Victorian Tile collection is produced in 5 unique patterns (Burford, Balham, York, Chester and Checkers). Each one uses different components to create various patterns. The components we use below are fully interchangeable and colour combinations can be swapped to create your perfect, bespoke floor.

Component 1

Size
228.6mm x 228.6mm

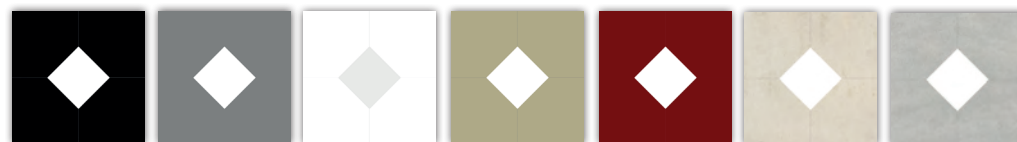

made from 21 individual squares and triangles

White / Black White / Grey White / Beige Black / Grey / White Black / Navy Blue / Pale Blue / White Black / White Cream / Greystone / Pale Green Greystone / Grey / Pale Blue / White

or
101.6mm x 101.6mm
102

Black Grey White Beige Terracotta Navy Blue Pale Blue Pale Green Cream Greystone

Its All in the Detail

Unlike printed tiles, made to look like mosaics, our Victorian Collection is made up from individually cut and bevelled pieces of LVT.

As you can see here, the Component 1 is a 228mm x 228mm tile made up of 21 individually cut and bevelled squares and triangles, to create that beautiful authentic Victorian floor, full of character & charm.

Create a Statement

Victorian Tiles are a sure way to create that bold interior statement. Explore the options, designs and features in our stunning collection

Burford

Burford is a timeless, classic pattern very popular in the Victorian era. It looks fantastic in bold black and white or more muted tones, using stone and pastel shades, which works well in more modern settings.

The Pattern

All Components in above pattern form a total size of 304.8mm x 304.8mm

Burford BUR002

The Look...

Laying on a 45 degree angle and adding a diamond border, offers a stylish and traditional look to your space. This particular look works amazing in hall ways.

Component A
Black / Grey / White

Component B
Greystone

Component C
Pale Green

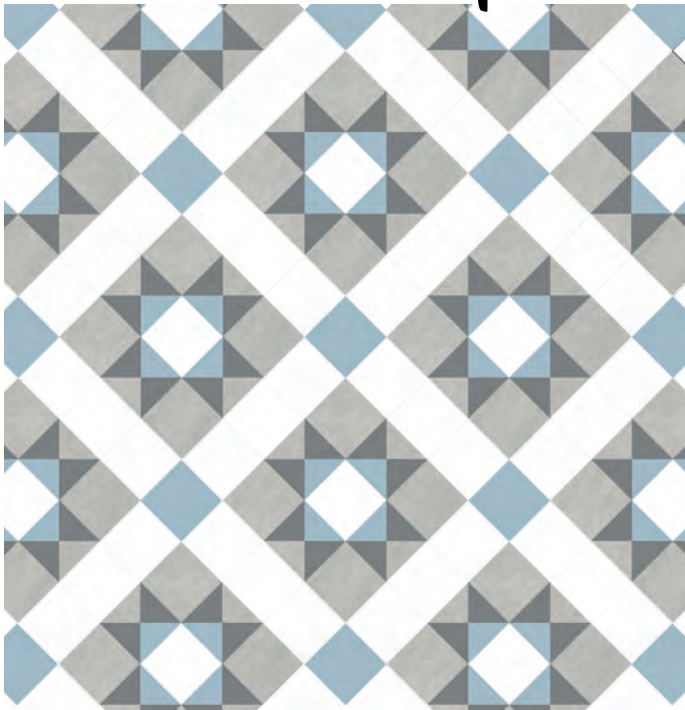

Get Personal!

The beauty of our Victorian Collection, is that you can swap around components to create a personalised floor. This traditional look can be customised, by substituting the Component C from White to Navy Blue, Terracotta or any colour available from our collection shown on the previous page.

This subtle change allows you to bring in accent colours to your floor, helping bring all your colour scheme together.

Borders

Borders can add a different dimension to your Victorian Tile floor and help finish off the look.

We offer diamond borders as well as design strips, both offer different options and can also be used together to build up your border.

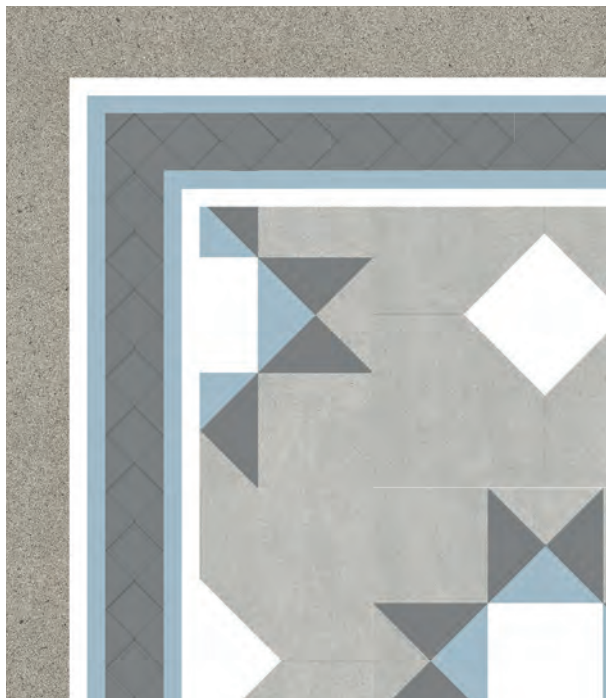

This combination uses white and terracotta design strips with the black and white diamond border. Layering up design strips with the colours of the main floor can really add a stunning feature

This example is using just a singular pale green designs strip. A clean and simple border option, which still gives definition, whilst allowing the main floor to take the attention

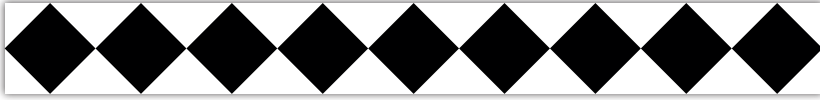

Similar to the example above, this border uses four separate design strips, two on each side of the grey and white diamond border

The engraved diamond border, is a more subtle way to add some intricacy detail, whilst still maintaining the focus on the main floor pattern. This example uses the engraved grey, with white and pale blue design strips

Diamond Border

Terracotta

Navy Blue

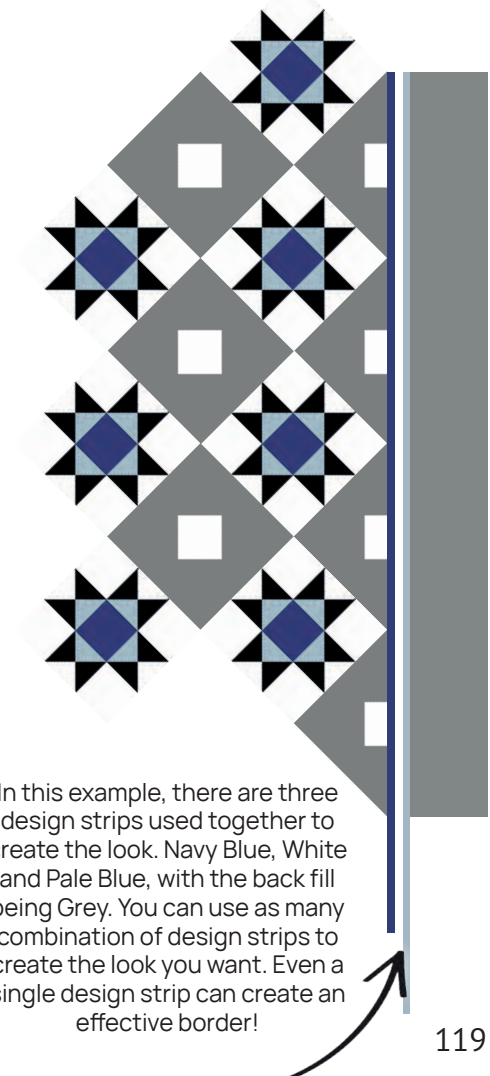

Pale Blue

Pale Green

In this image, the Diamond Border is used in Grey & White, flanked with Grey and White design strips. You can use various different colours to personalise your floor. Adding a mixture of design strips in different colours and matching with the back fill can create a stunning combination.

In this example, there are three design strips used together to create the look. Navy Blue, White and Pale Blue, with the back fill being Grey. You can use as many combination of design strips to create the look you want. Even a single design strip can create an effective border!

Benefits of Rigid Click SPC Floors

Naturally Quieter Underfoot

All our rigid core floors are quieter underfoot, reducing noise by upto 18dB.

Speedy Installation

Due to the Uniclic click system, built in underlay and minimal preparation required, our rigid core can be installed in quick time.

100% Waterproof

All our floors are waterproof, meaning they make a perfect floor for bathrooms, kitchens or any other problem area.

Minimal Fuss

Can be installed directly over most existing hard floors providing the floor is level, flat and smooth, (such as marble, porcelain or ceramic tiles).

Plank Styles

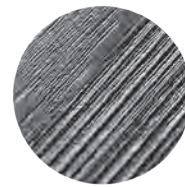

A collection of our floors are available in SPC (Stone Polymer Composite) rigid core click system. Ideal for use over existing level, smooth and flat sub floors, where minimal preparation is required. Browse through our various options.

Installation Advice

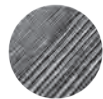

When installing Rigid Click SPC Flooring, it is essential to understand if the floor you are laying on top of is of the required standard for this product. Your subfloor, must be flat, smooth and level. No more deviation than 2mm over a 1 metre distance or 1mm over a 20cm distance. To achieve these levels, most often than not additional subfloor preparation will be required, such as ply board and/or smoothing compound. You must not add additional underlay underneath our SPC flooring products, the built in underlay offers the maximum compression the products can withstand. For any further advice or installation information, this is displayed on our website as well as the packaging the flooring arrives in.

How to Buy j2 Flooring...

Our floors are distributed and sold through a selected network of quality flooring retailers, contractors and distributors nationwide. To find your nearest supplier, please visit our website

www.j2flooring.com/find-a-retailer

Our supply partners have experience in Luxury Vinyl flooring and can show you samples of our floors, advising you of the best product to go with. Most will also offer a full measure, supply & installation service.

If for any reason there is not a supplier close to you, please contact us on 01704 536 421 and we will assist you further.

Please note we do not sell direct to public

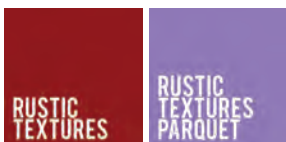

Your Peace of Mind

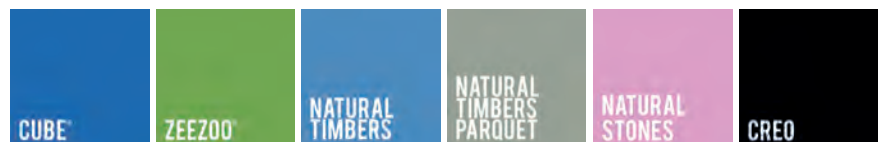

All our floors come with a wear guarantee. The warranty covers the wear layer of the product, which is the top surface layer that is extremely durable and hard wearing. Providing the floor is cleaned and maintained according to our cleaning and maintenance instructions (see page 73 for further details), see below the guarantee period we offer for each product range

12 Year Domestic Wear Guarantee

Lifetime Domestic Wear Guarantee

How it Works...

Once your j2 Flooring is installed, your supplier will need to contact us with their (our) invoice number, your name and address, the product installed and the installation location. Once we have this information, we will create a guarantee certificate and send it to your supplier

Need More Inspiration?

Our Social Media pages and stories are packed full of product installations, which is a great way to see some more images of how your favourites look in different spaces & finding some inspiration along the way. Make sure you follow us on our various platforms, to receive latest news and installs...

Cleaning & Maintenance

Cleaning and maintaining j2 Flooring products is simple, however it is extremely important to use the correct products regularly, to keep your floor looking new for longer. Using the correct methods and solutions will not only protect your floor from scratches and scuffs, but will also provide UV protection, which is important for colour fastness. Floors regularly cleaned with non Luxury Vinyl specific cleaners will be void of our wear warranty. We recommend using Dr Schutz cleaning products with our floors. Below we have a list of the correct solutions, by Dr Schutz, which you should use on a regular & annual cleaning cycle. All solutions are simply mopped onto the surface, no special machinery is required.

For more information, please speak to your j2 Flooring supplier, or visit the Dr Schutz website

1. Daily Cleaner

Special active cleaner for day-to-day cleaning of your j2 Flooring. Its excellent dirt binding ensures that all marks and stains are removed. Refreshes the floor at the same time while cleaning the surface.

2. Clean & Strip

Mild stripper to remove old care layers and heavy build up of dirt and residues. This process should be done at least every 8-12 months, to strip all impurities off the j2 flooring and leave it stripped ready for the Floor Mat coat.

3. Floor Mat Protect

Protects the floor with an elastic, anti-slip mat care film. Can be used as a daily cleaner, or used after the Clean and Strip to re-apply the PU Coating & protects the floor. Should be re-applied at least every 8-12 months to re-invigorate and re-coat the floor.

Floor Care Kit

Floor Care Kit includes all the bottles required, including mop head and pads as well as furniture protection and instructions. We recommend purchasing one of these at the start and then topping up the bottles when required.

Care Tips...

Caring for your floor is important to keep up its appearance and performance, please find some handy tips below to help you care for your new j2 flooring.

- Use the correct cleaning solutions and methods as above
- Purchase a good quality washable door mat, with a recycled backing (important to prevent plasticiser migration occurring), for each entrance from outdoors. This will remove unwanted moisture, grit and dirt and prevent it from entering the home and onto the floor. We recommend Hug Rug products (pictured right), who do a variety of colours, patterns and designs
- Apply quality furniture pad protection under any furniture, which has the capability to slide across the floor, such as dining chairs and tables. We recommend MagiGLIDES.
- If using a castor wheel chair, use a protective mat, to prevent premature wear and point loading (especially on the SPC Rigid Click products) to reduce chance of damage.

Hug Rug produce some great designs, which are suitable on top of j2 Flooring

Free Sample Service

At j2 Flooring, we offer a free sample service for all our floors, so you can see them in the comfort of your own home, allowing you to feel the texture, shade and style and create your very own mood boards. Simply visit our website and find the product you like the look of, and you will see an option to order a free sample. We also have the option to purchase a full size piece of your favourite, so you can get a better idea of the full floor and the format it will be supplied in.

Being able to compare samples with other materials, paint and wallpaper, gives you the ability to see how our floors will look when placed in your space.

Colour can vary heavily amongst samples, so we recommend ordering a couple of pieces, if the design you like has a variety of shades in it. All images on our website demonstrate the way the floor may look in a larger area, so you get a true look of the style this will create.

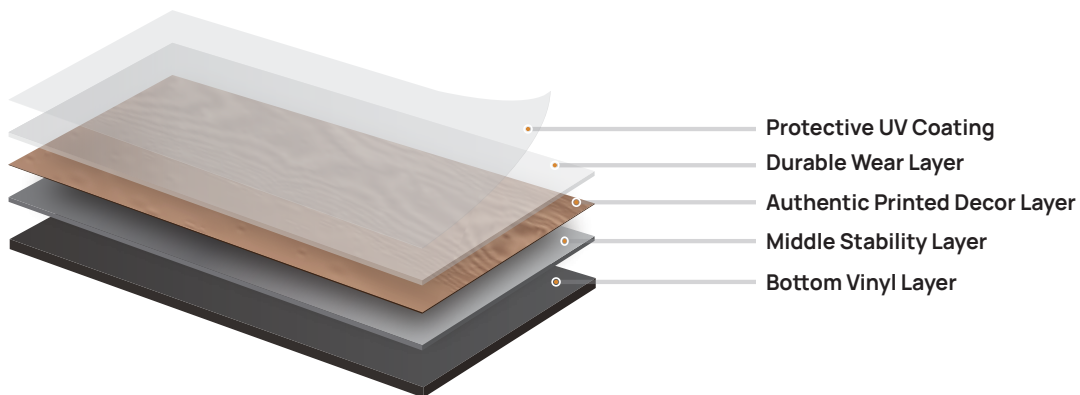

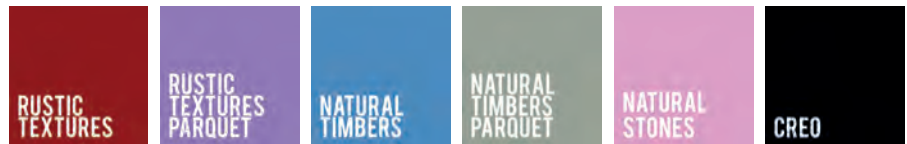

Many of our supply partners will have our display stands, which is a great opportunity to see a larger area of the floor before making your decision.

Product Information

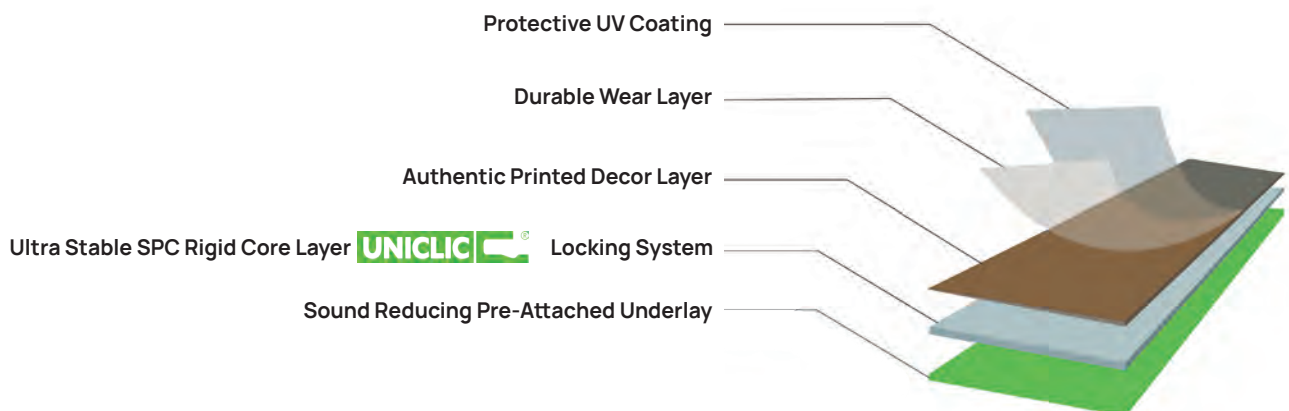

j2 Flooring is produced to the highest standards of LVT and SPC products. Our products are produced in a quality environment using the best technology to create high performing and aesthetically beautiful floors. Below you can see how each product is constructed. Each layer plays an important role in the product, from anti-scratch technology, to stability and aesthetics, they all are required to give you a floor that's durable and looks amazing.

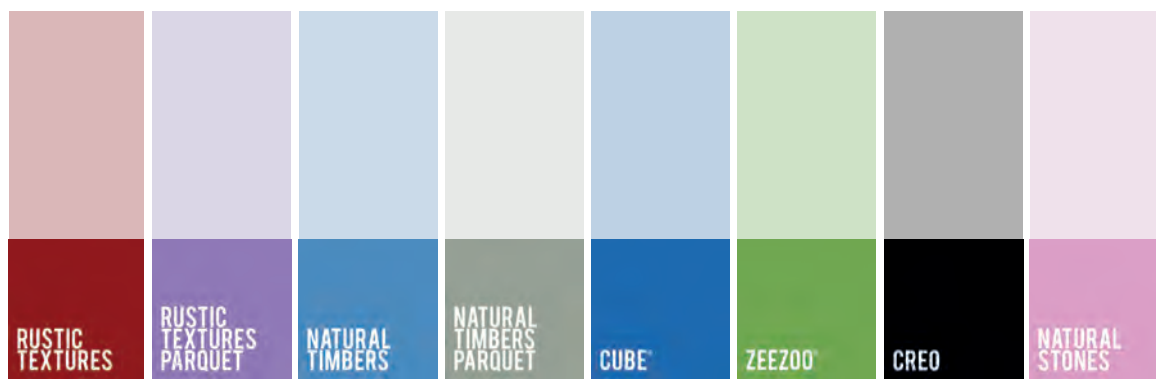

At j2 flooring, we are extremely passionate about our floors and invite you to ask any questions from our technical department. If there is anything you need or want from a floor, we will have the answer. Please find more specific information overleaf on each range. Again, more technical information is available from our technical department, contact us for more details.

Popular Laying Styles for Gluedown LVT

Gluedown LVT can be laid in a variety of different laying styles to suit your space and style. It does not matter what size tile or plank you choose, all of our gluedown products can be laid in any format. Below is selection of some popular laying styles. Consult with your installer before deciding on a layout, as they may offer some expertise on how these will look in your space.

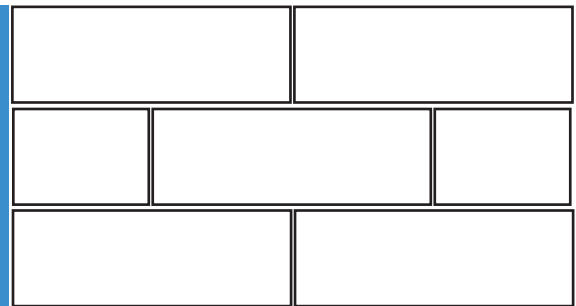

Straight Laid

Still the most popular laying style as this is the traditional laying style of wood planks. The joints are staggered to give a more random and natural look.

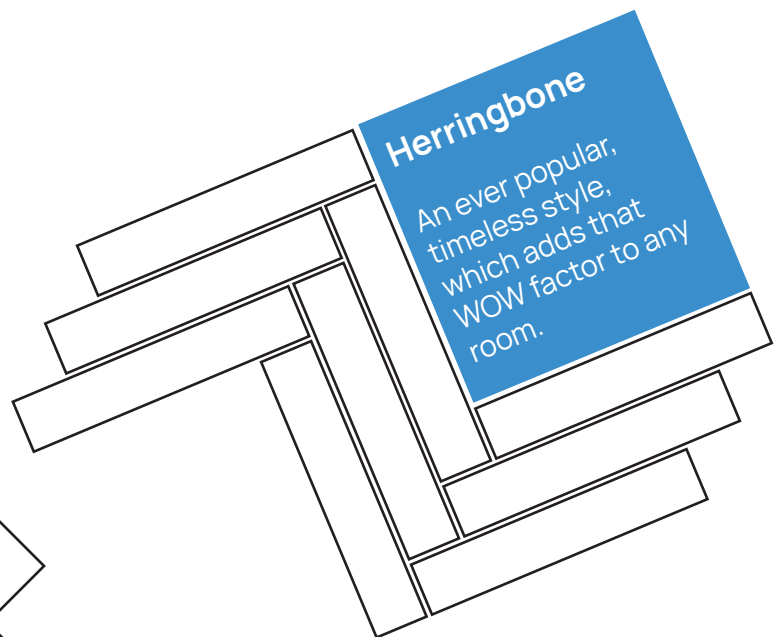

Brick Bond

A popular look for the rectangular tile styles. Tiles are laid in a uniform half bond

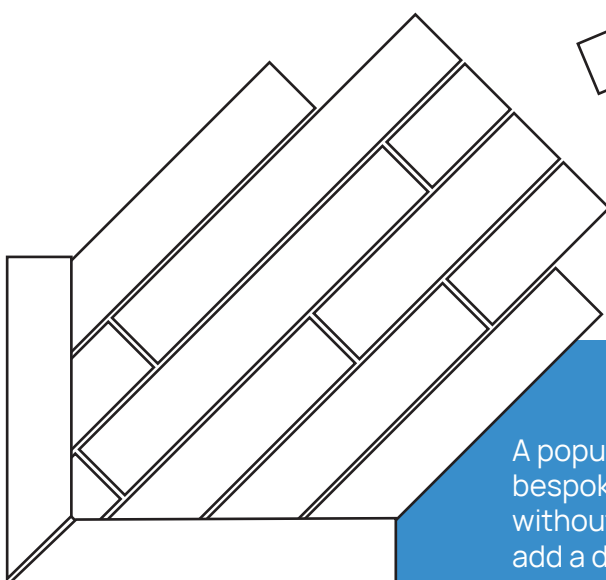

Herringbone

An ever popular, timeless style, which adds that WOW factor to any room.

45 Degree

A popular design floor laying style, which creates that bespoke look to your space. This style looks great with or without the addition of a border plank as shown. You can add a design strip to highlight the border even further.
